## Part of a series of profiles of Latinos in New England | March 2003

The Mauricio Gastón Institute for Latino Community Development and Public Policy

The Mauricio Gastón Institute of the University of Massachusetts Boston conducts research on and for the Latino population. A goal is to generate the kind of information and analysis necessary to develop sound public policy, and to improve Latino participation in the policy making process. In an effort to present vital information about Latinos to diverse audiences, the Gastón Institute has produced a series of basic demographic profiles for the states and selected cities of New England, based on the United States Census 2000.

Census 2000 data include changes in the way people were counted. The most significant change is to allow persons to select more than one race, creating a new multiracial category of "two or more races", but meaning people may not be included in the race with which they most identify. There was, however, no way to choose more than one ethnicity; one must choose either Latino or not. Throughout this profile, numbers reflect Latinos of all races, or non-Latinos by race, with persons of two or more races counted separately. All categorizations are based solely on self-identification. All of this complicates comparisons between 1990 and 2000 data. However, the concepts are similar enough to make trends and patterns clear.

In Manchester, the general population changes from 1990 to 2000 were (similar to) national and state trends. The population of people of color — African Americans, Asians, Latinos, Native Americans, and Pacific Islanders — grew at a higher rate than did the population of non-Hispanic Whites(see table 1). The total population of Manchester increased by 7.5%, but its composition changed substantially. Latinos had a larger numerical growth than any other group, increasing by 2,823 or 133.1%, although "some other race" and Asians had a higher percent increase. Latinos now represent 4.6% of the population, an increase of 2.5 percentage points and the largest gain of any group. Manchester has the second largest population of Latinos in New Hampshire and the 32<sup>nd</sup> largest in the New England states. As a percentage of the total population, the Latino population in Manchester ranks second in the state.

## Table 1

## Manchester - Growth by Ethnicity

	2000		1990		Growth		Change
	Number	Percent	Number	Percent	Number	Percent	in Percent
Hispanic or Latino	4,944	4.6	2,121	2.1	2,823	133.1	2.5
White	95,581	89.3	95,230	95.6	351	0.4	-6.3
Black or African American	2,045	1.9	901	0.9	1,144	127.0	1.0
American Indian and Alaska Native	287	0.3	193	0.2	94	48.7	0.1
Asian <sup>a</sup>	2,470	2.3	1,066	1.1	1,435	134.6	1.3
Pacific Islander <sup>a</sup>	31	0.0				•	
Some other race	145	0.1	56	0.1	89	158.9	0.1
Two or more races <sup>b</sup>	1,503	1.4					
Total	107,006		99,567		7,439	7.5	

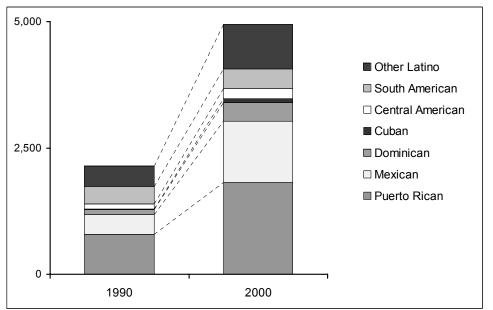

Sources: Census Bureau: 2000, 1990(a). Note: Growth figures will not balance due to the new multiracial category. a 'Asian and Pacific Islander' was split for the 2000 census. Growth and changes reflect combined total. <sup>b</sup> There was no equivalent category in the 1990 census.

### Table 2

Manchester - National Origin of Latinos									
	2000		<b>1990</b> <sup>a</sup>		Growth				
	Number	Percent	Number	Percent	Number	Percent			
Hispanic or Latino	4,944		2,142		2,802	130.8			
Mexican	1,220	24.7	391	18.3	829	212.0			
Puerto Rican	1,811	36.6	786	36.7	1,025	130.4			
Cuban	78	1.6	9	0.4	69	766.7			
Dominican Republic	367	7.4	108	5.0	259	239.8			
Other Central American	195	3.9	96	4.5	99	103.1			
Other South American	392	7.9	348	16.2	44	12.6			
Other Hispanic or Latino	881	17.8	404	18.9	477	118.1

Figure 1 Manchester - Growth and Change of the Latino Population

Sources: Census Bureau: 2000, 1990(a).

All Latino national-origin groups grew significantly between 1990<sup>1</sup> and 2000. The largest group in Manchester is Puerto Rican, at 36.6%, followed by Mexicans and "Other" Latinos. "Other" Latinos were among fastest-growing population, growing by 118.1%, a trend seen across the U.S. (see table 2 and figure 1). A person is counted as "Other" if they write in "Spanish" or give an answer that can't be assigned to a particular nationality (such as "Latino"), or if they identify more than one origin, or leave the answer blank. Future scholarly studies may better describe the composition of this category. The detailed breakdown of Central and South Americans is available at the Census Bureau's American Fact Finder service, online at: *factfinder.census.gov*.

Manchester - Households by Tenure								
2000		1990		Growth		Change

Latino-headed households are much more likely to rent than to own their home, 82.8% versus 17.2%, and there has been a 2.3% decrease in home ownership since 1990 (see table 3). This is much lower than the state average of 69.7%. Although there has been a small growth in the proportion of non-family households, it is still true that most Latinos, 74.4%, live in family households (see table 4). Married couples with children represent 29.8% of Latino-headed households, slightly more than the New Hampshire average of 26.2%. Families made up of a single female with children account for 18.2% of Latino households, which is greater than the state average of 6.2%, and greater than it was in 1990.

### Table 4

Manchester - Family Structure								
	2000		1990		Growth	Change		
Latino Headed Households	Number	Percent	Number	Percent	Percent	in Percent		
Families:	976	74.4	469	70.4	108.1	4.0		
with related children <sup>a</sup> :								
Married Couple, with children	391	29.8	206	30.9	89.8	-1.1		
Female Head, with children	239	18.2	95	14.3	151.6	4.0

2000: Census 2000 Summary File 1 (SF1) 100% Data.

1990(a): 1990 Census Summary Tape File 1 (STF1) 100% Data.

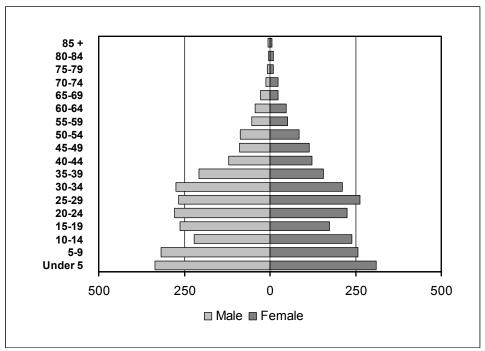

1990(b): 1990 Census Summary Tape File 3 (STF3) Sample Data.

1992: 1990 Census of Population: General Population Characteristics. Washington DC: GPO.

Notes:

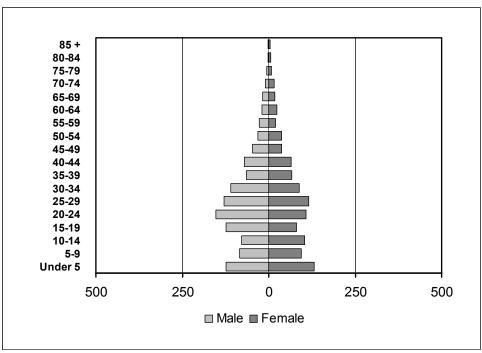

<sup>1</sup> Sample data from 1990 are based on the "Long Form" files. About one person or household in six receives the Long Form Census. The estimates from there do not match the enumerations in the 100% or "Short Form" data. There are sources of error in any census or survey; however the estimates here are accurate enough to note trends and patterns.

Figure 2 Manchester - Age Profile 2000

Sources: Census Bureau: 2000, 1990(a), 1992.

## Figure 3 Manchester - Age Profile 1990

Sources: Census Bureau: 2000, 1990(a), 1992.

The age composition of Latinos in Manchester has changed. There has been an increase among all age groups, but especially among those in the middle years. Even though there are many more children, the overall Latino population is maturing (see figures 2 and 3).

While the Latino population in Manchester and in the rest of the country remains relatively young, it is older than it was in 1990. In 2000, 42.8% of Latinos were younger than 20, just slightly greater than the 38.7% in 1990 (see table 5). The Latino median age of 23.7 is much younger than the overall New Hampshire median age of 37.1. Women still tend to be older than men, but the gap closed during the 1990s. In addition to becoming relatively older, both Latinos and Latinas became less concentrated in the 20-29 age group (see tables 6 and 7).

Manchester - Latinos by Age								
	2000		1990		Growth			
	Number	Percent	Number	Percent	Percent			
Under 10 years	1,222	24.7	434	20.5	181.6
