Dirk Messelaar Appointed Dean of Newly-Reconfigured Division

By Anne-Marie Kent

In the July 14th Chronicle of Higher Education, University of Georgia professor and former Georgia governor Zell Miller lists "10 Crucial Things the Next President Should Do for Colleges." Among them is recognizing "the tremendous ramifications of information technology for higher education." Miller writes, "Education is an important part of the emerging electronic culture that is changing our world."

If the newly-appointed dean of the Division of Corporate, Continuing, and Distance Education (CCDE), Dirk Messelaar, has his way, UMass Boston will be a regional leader in this new world. In only a few months, he has commissioned five working groups composed of faculty, professional, and classified staff from throughout the university. The result: a seven-page draft outline of nearly 30 specific objectives in five areas, including corporate education; distance learning; credit courses and programs; marketing and outreach; and student services.

Dean Messelaar's three-year plan has four bold targets: to form corporate partnerships with 20 local companies; to create 20 industry-driven professional certificate programs; to offer 20% of CCDE courses in some kind of distance medium or off campus; and finally to offer a state-of-the-art information technology (IT) degree that will allow UMass Boston to be seen nationally as a leader in developing rigorous academically-based courses responsive to the regional market.

Dean Messelaar states, "I have the clear goal of making UMass Boston one of the largest, if not the largest purveyor of continuing education and training in New England." Can he do it? If past experience predicts future success, there is very good chance. As director of continuing education at the University of Massachusetts Lowell, he helped develop over 30 market-driven certificate programs; expanded distance education capabilities and corporate partnerships; founded and co-chaired UMass Lowell's Community College Network (which resulted in 45 new off-campus course offerings); presided over the Massachusetts Council for Quality, linking the university with 150 member companies; and helped secure $1.2 million in workforce training grants.

Former Governor Dukakis Visits UMass Boston

By Leigh DaPau

UMass Boston welcomed three-time Massachusetts Governor and 1988 Democratic presidential candidate Michael Dukakis to campus on September 13 as a special guest in Maurice Cunningham's "The American Presidency" class. In a casual but informative session, the former governor talked with a class of more than forty students about his past experiences with candor, opening the door for a former participant in the debates to come to class. So, I invited the former governor by letter and followed up with a phone call. He was very gracious and eager to come," Cunningham notes.

The class was open to all interested students and faculty, and those attending filled the room and overflowed into the hallway and the adjoining classroom. Joining the Governor were William M. Bulger, Governor Dukakis talked about his presidential bid in 1988 and answered questions from students and faculty about politics, the debate, and the media.

Dukakis discussed his experiences with candor, opening the discussion with the comment, "Getting beat teaches you a few things." His narrative began with the moment he decided whether to run for the presidency. He described his love for public service and how much he had enjoyed his job as governor of Massachusetts. When he talked with his family about his concern for them if he decided to run, his son urged him to do it, saying it was his duty.

Another inspiration for Dukakis was the opportunity itself. He commented on how amazing it was to him that a son of Greek immigrants could run for the Presidency. He cited John F. Kennedy's initial need to convince continued on page 4

Watch for the Commemorative Debate Issue in November
New Freshman Honor Society for UMass Boston

By Patricia Davidsen

Good news has just reached UMass Boston. Our request for a chapter of Alpha Lambda Delta, a national Freshman Honor Society, has been granted. The installation ceremony for our new chapter, including the initiation of charter members, is planned for November 6 from 6:00 to 9:00 p.m. in the Ryan Lounge. The University community, parents, and friends are invited to this special celebration.

Alpha Lambda Delta, founded at the University of Illinois in 1924, has four major goals: to encourage superior academic achievement, to promote intelligent living, to promote a continued high standard of learning, and to assist students in recognizing and developing meaningful goals for their roles in society.

To be eligible for Alpha Lambda Delta, students must have at least a 3.5 grade point average for their first semester of study or a cumulative grade point average of 3.5 or higher for their first year of study at the University. Students must have studied full time (12 credits or more per semester) during that first semester or first year and have a total of fewer than 30 credits.

The society offers various awards and fellowships, plus leadership opportunities and activities. Having a chapter on this campus will help students build a strong and lasting foundation for success at UMass Boston. This is one of our major retention efforts for first year students, along with the First Year Experience courses (part of the revised General Education curriculum) and the expanded Early Warning System (part of the University Advising program).

The first steps in the process of forming this chapter of Alpha Lambda Delta began just a year ago when Glenda Earwood-Smith, executive director of Alpha Lambda Delta, was invited by Adrian Haugabrook, assistant dean of students, to meet with key people on this campus. At this meeting, it was decided that Haugabrook and Patricia Davidsen, vice provost for academic support services, would serve as sponsors and advisors and that we should first form a local chapter, Lambda Delta. There were just over 100 eligible students who were invited to one of four informational sessions.

On April 3, 2000, we held an organizational meeting to approve the constitution and by-laws and to elect officers. The officers are Imane Elghiti, president; Hwaajung Lee, vice president; and David R. Howard, treasurer. On May 3, 2000, at a ceremony attended by top campus officials, faculty, staff, parents, and friends, we inducted 57 charter members into Lambda Delta. These students are a very diverse and interesting group, including 17 international students. Some of the charter members have already expanded their academic involvement by serving as tutors and mentors this summer for the GEAR-UP program, which is a partnership between the University and participating middle and high schools aimed at increasing the number of students who will successfully pursue post-secondary education.

Several students have already joined our four-year Honors Program, and we anticipate that many of these students will join our Golden Key National Honor Society as juniors and seniors. Those who wish to become members of Alpha Lambda Delta will be initiated along with the members of Lambda Delta to form our official group of charter members. On November 6, we also plan to initiate a small number of honorary members from the administration and faculty. We will pay special tribute to Chancellor Sherry H. Penney, who was a former president of her Alpha Lambda Delta chapter at Albion College.

Tribute Luncheon Celebrates Polly Logan

By Kim Burke

The brightest stars in the Massachusetts Republican Party were in attendance at a tribute luncheon for the namesake of a new endowed fund for the Center for Women in Politics and Public Policy. Polly Logan, one of the party's most respected leaders and activists, was celebrated on September 11 in the Grand Ballroom of the Fairmont Copley Plaza Hotel to announce the establishment of the Polly Logan Fund.

Polly Logan has been a key figure for many elected officials and scholars to give public lectures, and conduct innovative and timely research on public policy issues affecting women. A longtime supporter of the Center for Women in Politics and Public Policy, Logan was invited to the podium to announce the establishment of the fund.

The luncheon was hosted by the Massachusetts Republican Party and was attended by Governor Paul Cellucci and Lt. Governor Jane Swift, who joined the crowd to sing the praises of a mentor and activist who transcends Republican stereotypes. In her remarks, Lt. Governor Swift described Logan as a "friend and supporter" who is quick to send an encouraging word when needed. Governor Cellucci came to the podium with just praise but a proclamation making September 11, 2000, "Polly Logan Day" in Massachusetts.

A longtime supporter of the Center for Women in Politics and Public Policy, Polly Logan was inducted into the Center's Hall of Fame in 2000, and her legacy continues to inspire women and men to "prepare for leadership" and to "promote civic activism and involvement." The establishment of the Polly Logan Fund, Penney remarked, is in honor to "an individual who has spent her lifetime committed to civic involvement."

With the establishment of the Polly Logan Fund, the Center will be able to enhance its scholarship and mentoring program for graduate students, attract distinguished officials and scholars to give public lectures, and conduct innovative and timely research on public policy issues affecting women. Center Director Elizabeth Sherman is thrilled by the possibilities the Logan Fund will bring to the Center and the University. She estimates that nearly $250,000 in contributions have been received to launch the fund.
Wood Visiting Professor Named

By Jeffery Mitchell

Xavier de Souza Briggs is this year’s Robert C. Wood Visiting Professor in Public and Urban Affairs. During his visit to UMass Boston, planned for September 27 and 28, he expected to take part in a policy discussion forum and a variety of meetings, and to give a public lecture titled “Roads Ahead: Reflections on Urban Politics and Policy Issues Facing the Next President and Congress.”

Briggs is an assistant professor of public policy at the John F. Kennedy School of Government at Harvard University. In 1996, he took a two-year leave from the Kennedy School and was appointed by President Clinton as assistant secretary for policy development and research at the U.S. Department of Housing and Urban Development. He was a senior advisor to the White House and the secretary of his department on a wide range of urban policy topics, and he managed complex political issues, focusing on smart growth and economic development. He has written extensively on housing policy, community development, social capital, access to jobs, and other policy issues. His publications include From Neighborhood to Community: Evidence of the Social Effects of Community Development (with Elizabeth Mueller), the first-ever empirical study of the impacts of community-based development organizations on residents’ lives.

The Wood Visiting Professorship was established by Robert C. Wood to bring distinguished and thoughtful scholars and public figures to the university to lecture, lead seminars, and engage students and faculty in discussions of public policy and political life. Wood has served as U.S. secretary of housing and urban development, superintendent of Boston schools, president of the University of Massachusetts, professor of political science at MIT, and senior fellow at UMass Boston’s McCormick Institute. Xavier de Souza Briggs is the second Wood Visiting Professor; the first was Charles Hamilton of Columbia University.
New Instructional Technology Center Energizes Learning at UMass Boston

By Anne-Marie Kent
Not too long ago, Professor Richard Gelpke of the Earth and Geographic Sciences Department approached the Learning Center. He wanted help developing a web site for his "Global Environment" course. Before long, Professor Gelpke's students were accessing course materials online.

While he ran into a few glitches—most caused by limited equipment resources—Professor Gelpke was pleased with his overall experience and continues to use technology in his classrooms.

He wanted help developing a web site for his "Global Environment" course. Before long, Professor Gelpke's students were accessing course materials online. While he ran into a few glitches—most caused by limited equipment resources—Professor Gelpke was pleased with his overall experience and continues to use technology in his classrooms.

Newly appointed ITC director, Sara Baron, says that the goal of the ITC is "to improve and increase instructional technology on campus."

She explains, "Instructional technology—the use of technology including PowerPoint presentations, video, and web-based technology—provides faculty with the opportunity to teach the same old subject in a different way, and that's exciting for students."

And students, according to Professor Gelpke, expect it. They come to the university, he says, "with more and more of an understanding and indeed expectation, that technology will be a key item in the classroom setting."

Baron outlines three possible stages of faculty involvement. A faculty member might begin by taking a Learning Center workshop. "The Learning Center has been making a concerted effort," says Program Coordinator Jason Belland, "to provide effective instruction in the areas most needed."

In the past year alone, the Learning Center has served over 2,100 faculty and staff. After taking a Learning Center workshop, a faculty member might choose to visit Media Services to implement an idea. For example, a professor who learned PowerPoint at the Learning Center might want to implement a custom presentation in the classroom. "Media Services will support that faculty member with equipment and advice. It's a big job and they do it very well," says Baron.

Raymond Melcher, Media Services director, estimates that in the past 15 years the use of media in the classroom has almost doubled.

Interestingly, the overhead projector was the most-used piece of equipment 15 years ago and is still the most popular. However, video tape players have come up the list to second most-used and computer projections, while nearly unheard of eight years ago, have moved to third place.

Baron suggests that faculty who have developed strong familiarity with instructional technology in the classroom might want to consider the third possible level: teaching via distance learning. Baron notes that the ITC works very closely with the Division of Corporate, Continuing, and Distance Education. This year, 18 classes were supported by Distance Learning, serving 188 UMass Boston students and 141 students at remote locations. Those numbers are expected to rise in the coming years.

Baron says that among her goals is increasing faculty response at all levels. She says, "Some faculty are just now realizing 'I can put my syllabus on the web. I can make a PowerPoint presentation. Hey—this is an exciting way to teach my students'!"

Excited by his own explorations of instructional technology, Professor Gelpke is interested in doing more, and he is looking for more help—not so much with the technology, but, with "the pedagogy of just how to incorporate this technology into the classroom."

He says, "I am not talking here about "distance learning" but rather 'close-up learning.'"

Baron, her ITC staff, and their faculty advisory board will continue to work to respond to this and other faculty needs as more faculty and staff take advantage of ITC resources.

---

Messaelaer (cont.)

Dean Messelaer says, "There is a lot of opportunity to bring the Lowell experience to Boston."

He assures, however, that this will not detract from the Boston Division's existing strengths.

The Division here has developed probably one of the largest and best continuing education units serving traditional college students, with one of the largest summer schools in New England. He notes that the combination of low cost, high quality, and convenient location makes UMass Boston a summer magnet for credit-seeking students.

Dean Messelaer is aiming to attract those seeking job-related credentials as well. "The bachelor's degree is no longer the coinage of the working professional," he explains. "It provides a good generalist foundation for more specialized education."

The university, according to Dean Messelaer, must see that professionals are interested in lifelong learning.

That interest, he explains, is largely spurred by workforce demands. One curious evolution here is that rather than using standard degrees, people are now relying much more on focused experiences that allow them to get industry-based outcomes."

Already the only UMass campus offering vendor-certified programs, UMass Boston is poised for further growth. With the assistance of Professor Richard Eckhouse, the Division is working with the Department of Computer Science and the College of Management to coordinate IT education. Their goal is to develop not only certificates, but also a bachelor's degree in IT.

Dean Messelaer also plans to expand distance learning. He will recommend that UMass Boston contract with E-College, a nationally-based provider, to offer IT courses to industry. He explains, "These aren't canned courses that happen to be taught by UMass Boston faculty, but UMass Boston courses taught by UMass Boston faculty."

Reflecting on the new changes, Provost Charles Cudde states, "Dean Messelaer brings with him extensive experience in continuing and distance education and he has great enthusiasm for our campus. I'm confident that his work will benefit our students as well as our region's economic development."
Did you know which president wore a pair of blue suede shoes? Which president preferred white bucks? University faculty, staff, and students can find out these answers and more by visiting the Presidential Shoe Collection at the Healey Library lobby through October 4. The three-case presidential shoe exhibit features shoes of twelve former United States presidents, including those of Abraham Lincoln, Ulysses S. Grant, Theodore Roosevelt, Woodrow Wilson, Warren Harding, Harry S. Truman, Dwight D. Eisenhower, John F. Kennedy, Lyndon Johnson, Richard Nixon, Gerald Ford, and Ronald Reagan. The tour is sponsored by Johnston & Murphy, shoemakers to presidents since 1850, and has made several stops throughout the country. The exhibit was brought here as part of the celebration of the first presidential debate of the 2000 general election, held at UMass Boston on October 1.

Early Learning Center Leads the Way

The UMass Boston Early Learning Center was recently chosen to be the lead agent for the Dorchester Community Partnership Cluster. The Partnership designation places the Center at the head of the group’s mission to build a collaborative system of early childhood programs and comprehensive services for Dorchester children and their families. The Center is accredited by the National Academy of Early Childhood programs and provides quality care from 7:30 a.m. to 5:30 p.m. for children ages 15 months to 5 years whose parents are students, staff or faculty at UMass Boston or residents of the Harbor Point community.

The Dorchester Cluster is supported by the 0-8 funding with the Massachusetts Department of Education Partnership for Children Program. Membership in the group is open to parents and caregivers of children, Dorchester and members of agencies that work with the children of neighborhood families from infancy to eight years of age. For more information, please contact the Early Learning Center Director, Kelly Meehan at (617) 287-6195 at kelly.meehan@umb.edu.

UMass Boston Joins “Page 1” Service Project

UMass Boston is joining Page 1, Middlebury College’s Centen­nial Service Project, an initiative to collect new books for needy children in all parts of the country. The two local programs to be served are The Neighborhood House Charter School in Dorchester, which needs non-fiction books, pre-kindergarten through 8th grade, on subjects like science, the environment, and history; and the Children’s AIDS Program House in Mattapan, which needs storybooks appropriate for children age 6. All books nationwide will be delivered on October 21, 2000.

UMass Boston’s participation is being coordinated by Patricia S. Davidson, vice provost for academic support services and a mem­ber of the Board of Overseers of Middlebury College. The effort is being co-sponsored by the Art Department and dedicated to the late Prof. Sam Walker, a Middlebury graduate who passed away on October 16, 1999.

Please bring a new book to UMass Boston’s Page 1 celebration, to be held on October 16, 2000 from 2:30 to 4:00 p.m. in the Harbor Art Gallery. If you cannot attend the party and still wish to contribute a book, please bring it to Pat Davidson’s office, M-3-412, any time before October 20.

Gerontology Honor Society

The first induction ceremony of the University of Massachusetts Boston’s Gamma Upsilon Chapter of Sigma Phi Omega Honor Society was held this past spring in the Healey Library Faculty/Staff Lounge. Sigma Phi Omega was established to recognize academic excellence and professional achievement in the field of gerontology. Thirty-two members, including undergraduate and graduate gerontology students, alumni, and faculty, were inducted at the ceremony. The current chapter leaders, Claire Safran-Norton, president, and Lanesy Bruner-Carhoto, secretary-treasurer, are both doctoral candidates in the Gerontology Ph.D. Program and were instrumental in helping to establish the local chapter. Gerontology faculty advisors Jeffrey Burr and Nina Silverstein also were instrumental in establishing the chapter.

Boston University’s Robert Hudson was the keynote speaker and a highlight of the induction ceremony. Professor Hudson is an internationally known authority on the role of policy as it impacts the well-being of older persons. Dean Ismael Ramirez-Soto ad­ dressed the new members and their guests, speaking about the importance of advocating for the needs of older persons and others. A reception was held following the ceremony. Anyone interested in learning more about the chapter should contact the Gerontology Center, 7-7300.

UMass Boston Chamber Orchestra Welcomes Bulgarian Musicians

The UMass Boston Chamber Orchestra will have two special Bulgarian guest artists for its Oc­tober 20th concert, being held at St. Paul’s Episcopal Church in Brookline at 8:00 p.m. Flutist Natasha Uzunova and clarinetist Mihail Deynov of the Vratza Phil­harmonic Orchestra will be fea­tured soloists with the members of the UMass Boston Chamber Orches­tra and UMass Boston pianist Timothy McFarland.

The concert will be a reunion for the international artists and Jon Mitchell, who guest conducted the Vratza Philharmonic two years ago. Uzunova will perform Bach’s Suite #2, and Deynov will per­form Richard Wagner’s Adagio for Clarinet and Strings. The orches­tra will also play Gustav Holst’s Brook Green Suite.

UMass Boston is the second leg of a three-state tour for the Bul­garian musicians. Before arriving at UMass Boston, they will per­form at St. Mary’s College in Fredericksburg, VA. From UMass Boston, they will move on to Michigan Technological Univer­sity in Houghton, MI, before re­turing to Bulgaria.

Distance Learning and the Nursing Program

The Division of Corporate, Continuing, and Distance Educa­tion has now put a College of Nursing program under its wing. In its third year, the Certificate in Long Term Care of the Elderly Resident/ Patient retains its stel­lar instructors from the College of Nursing. The program is designed to help practicing nurses and other experienced health care profes­sionals improve their knowledge base and the quality of care of resi­dents in long term care facilities. The four 10-week classes are made available to students through tech­nology provided by the Distance Learning Center. Locations at the Hebrew Rehabilitation Hospital and the 1495 Westboro campus are classes live via Picture Tel equipment. The enhanced teaching capabilities allow more students to participate in the pro­gram in non-traditional ways. Stu­dents can take classes at or near their workplace or even by video­tape. Program Coordinator Susan Babcock is enthusiastic about the distance learning aspect and looks forward to another year.

CM Students Represent UMass Boston at National Conferences

Abigail Reichenbach, a senior from Switzerland, represented the College of Management at the Business Tomorrow International Conference sponsored by The Foundation for Student Commu­nication and Business Today Maga­zine. The conference allows di­rect interaction between US busi­ness executives and students from around the world. The choices of successful applicants are based on their backgrounds and short essays. The conference offers panels, addresses, and case studies, as well as a few days in New York. Abhy, a native of the Philippines who speaks five languages, is pursu­ing a career in marketing in the financial services industry.

Steve Hornsby, another senior marketing concentrate, repre­sented the College of Manage­ment at the Direct Marketing Education Foundation’s Colle­giate Institute, held in Washing­ton, D.C. The institute is an in­tensive business seminar in direct/ interactive marketing taught by leading marketing professionals.

UMass Boston Sponsors Auto Theft Prevention Program

University faculty, staff, and students can help protect their cars from auto theft by participating in the Auto Glass Etching Program to be held on Thursday, October 19 in the lower level of the Sci­ence Center garage. The UMass Boston Department of Public Safety has been working with the Governor’s Auto Theft Strike Force to sponsor the initiative. Auto glass etching is proven to be a successful theft deterrent. Pro­fessionals chemically etch the car’s vehicle identification number (VIN) on all the windows including sunroofs and T-roofs. Par­ticipants will receive a 15% dis­count on their comprehensive auto insurance and a free one-day pass courtesy of the UMass Bos­ton Department of Parking and Transportation. The program will be held from 9:30 a.m. to 6:00 p.m. and the process takes about five to ten minutes. All interested must bring an active vehicle registration and pay a ten-dollar (cash only) fee. This fee is used to cover the expenses of the project. The Pub­lic Safety Department Crime Pre­vention Unit can answer any ques­tions about the program at 7-7790.

October spotlights were written by Kim Burke, Lanesy Bruner-Carhoto, Patricia Davidson, Leigh DuPuy, Melissa Fassel, Mary Ann Macmachan, Erika McCarthy
Debate Sponsor Presents Contribution

The New England Regional Council of Carpenters (NERCC) presented UMass President William M. Bulger and Chancellor Sherry Penney with a $50,000 contribution as one of the several sponsors of the presidential debate to be held on October 3 at UMass Boston. From Left to Right: Tom Keaedy, project manager of the CPD, Chancellor Sherry Penney, David Bergman, executive secretary-treasurer of NERCC, UMass President William M. Bulger, Tom Flynn, assistant administrator of NERCC, Paul Kirk, co-chairman of the CPD.

Arts on the Point Moving Ahead

By Theresa Halley

Arts on the Point, the public sculpture park project on the University campus, has experienced some setbacks in recent months, but hopes to be back on track very soon. Although the project was forced by neighborhood concerns temporarily to halt the installation of various works of art that had been in the planning stages for some time, Professor Tucker reports that a meeting will be held soon with University representatives, local politicians, and representatives from the community to institute a fresh start. To expedite this process, Arts on the Point has engaged Wendy Baring Gould, who has spent her career as an arts educator and community arts activist, to work with neighborhood groups and to implement university-community arts initiatives, particularly in Savin Hill and Harbor Point. These initiatives, when implemented, will bring the University and its neighbors closer together and will allow all parties to focus on a common goal: the realization of Arts on the Point and the creation of educational programs that will enhance the public's experience of the sculpture park, free of charge and accessible to all.

There are exciting plans on the horizon for Arts on the Point. Five sculptures are awaiting installation on campus. The first is a ten-foot bronze called Redlining Figure by the great Abstract Expressionist Willem deKooning, which is offered to us by the deKooning estate. It is from the series that produced Standing Figures, a sculpture that is at the entrance of the West Wing of the Museum of Fine Arts here in Boston. The second is Dennis Oppenheim's Source/Referent, a UFO-like structure which will be suspended as if flying through the columns of the Healey Library building. Gillian Jagger, a New York artist, is creating an installation of huge tree trunks that will be erected in front of the small pumping house next to the Kennedy Library property. Ursula von Rydingsvard is constructing an immense cedar structure, tentatively called Large Bezel with Mechanism, to overlook the ocean on the Quincy Bay side of the perimeter road. Finally, Stringer by Tony Smith sits in a warehouse awaiting the repairs to the footings that were vandalized last May, after which it will assume its position at the end of the line of trees along the Dorchester Bay side of the perimeter road. Visit the web site, artsonthepoint.com for more extensive information about the sculpture park and the works that are currently on exhibit.

Beacon Leadership Project Is Shaping Student Leaders

By Melissa Farrow

UMass Boston continues to develop programs to enhance its students' experience, one of the latest being the Beacon Leadership Project (BLP): Leaders at the Point, whose mission is to provide credit- or competency-based opportunities to develop and enhance their leadership skills and potential. Approximately 25 students are selected to participate in the BLP, a yearlong program at the university. All undergraduate students who hold a GPA of 2.5 or higher, and have completed at least 24 credits (or 10 competencies for CPCs) are sent invitations to apply. Faculty are also invited to nominate students, and graduate students may apply at any time during their studies at UMass Boston.

A selection committee composed of members of the BLP advisory board chooses the 25 students who will participate in the program. The 2000-2001 committee includes Sarah Bartlett, Diane D'Arrigo, Frances Hall, Adrian Haugabrook (chair), Christopher Hogan, Joyce Morgan, Donna Neal, Daniel Robb, Jain Radovich Higgins, Subrina Tarulli-Hughes, and Elaine Ward. During their leadership study, undergraduate and graduate candidates attend weekly seminars and maintain portfolios complete with journals, reflection papers, and assignments. At the end of the second semester, students give presentations on their service learning and community action projects, in which they apply what they have previously learned or experienced to a new environment. These projects, which also produce a service for a designated community, include events like Good Neighbor Day, an annual day of service that UMass Boston provides to the community. Past Good Neighbor Day activities have included serving at local food pantries, aesthetic cleaning-up (painting, laying new sand at playgrounds, etc.), visiting local day care centers, and tutoring.

The BLP is committed to serving UMass Boston's urban community by fostering an integrative and collaborative learning experience and drawing upon students' prior leadership, learning, and community service experiences. It aims to provide a shared ethos for continuous student learning and development, collaborative approaches to facilitate student success, and a focus on leadership for social change and service learning.

The Beacon Leadership Project is administered through the Office of the Dean of Student Affairs with support from the Office of Student Life. For more information, visit the BLP web site at http://www.umb.edu/mlb/leadership.

Dukakis Visit (cont.)

voters that, as a Roman Catholic, he would not be handing the country over to the Pope to run. Pointing to Gore's selection of Joseph Lieberman, Dukakis praised the diversity that is increasingly becoming a part of the bid for presidential office.

I really enjoyed the primaries, one commented in describing the early days. Still, he admitted it was a long process, pointing to the 85 days he spent campaigning in Iowa as an example. And once the conventions were over, he said, "It was a whole different ballgame." The pressure intensified as the campaign progressed. "It was a day-to-day fight," he said, and it was always one less day to the election. These were days filled with rigorous scrutiny from the media and endless examinations of the polls. "There could be up to 700 members of the press covering me at one time," he explained.

Another challenge for Dukakis was the Secret Service which he had been the last to agree to engage. He had been a man who commuted to work by subway and shopped for his family at the Stop and Shop Supermarket. With the Secret Service in his daily life, he said he felt wall ed off from the American people. A candidate's ability to connect to the American people despite these obstacles and project his or her true self is Dukakis' measure of success. "Both Reagan and Clinton have been able to do this very effectively," he pointed out. "Dole was not as successful. You would never believe this, but he has one of the best senses of humor in Washington."

Following the discussion of these challenges, Dukakis turned to talk about the current race and take questions from the class. Despite the polls, he argued that nothing matters to the press or the citizens are very interested in social security, and I think you'll see that reflected in how the state of Florida decides to vote." He said.

Students asked both Dukakis and President Bulger how important they thought the debates to be and how they explained low voter turnout. Both agreed that the debates are very important as they attract huge numbers of voters and reach both decided and undecided voters. Commenting on voter turnout, Dukakis went on to say, "Both parties have walked away from grassroots campaigns. This is a mistake that contributes to lower turnout."

The class concluded on a high note, with Dukakis praising public service and encouraging all who wanted a challenge and great rewards to consider it for their future careers.

Research and Workshops

Robert Chen, Bernie Gardner, Xuan Luo, and Juan Carlos R. Rice of the Department of Environmental Science, published a paper in the Journal of Geophysical Research: Space Physics, entitled "The Transfiguration of the Cosmos." Alice and the other conferees were stunned by the tornado that blew through town.

Carol Hardy-Fanta, research director of the Center for Women in Politics and Public Policy, presented a paper titled "Imagining Hope: The Unfortunate Traveler" at the 14th Conference of the International Society for the Promotion of and Integration of Women in Music at Bath, Wiltshire, UK.

Associate Professor Dennis Stevens, University of Massachusetts Amherst, presented a case study of three generations of sexual offenders of incarcerated sexual offenders at the annual Society of Police and Criminal Psychology held in Cleveland, Ohio on October 4.

Professor Julie Winch of the History Department gave a paper at a conference sponsored by the Park Service at Harpers Ferry, West Virginia to mark the two hundredth anniversary of the birth of radial abolitionist John Brown. She also edited and annotated the new edition of The Elite of Our People.

A pilot project to compute the Public Waterfront Act permits. This involves using Global Positioning Systems equipment and multimedia cartography, and development of a web-based delivery system.

Joel Gervaise, a biology graduate student, was awarded two highly competitive fellowships based on his thesis work. The fellowships were from the National Science Foundation and the Service to Achieve Results (STAR) Program of the Environmental Protection Agency. Joel’s research will examine long-term effects of deforestation on genetic diversity of red oaks in southern New England. These results will have important implications for forest management.

Publications

Jim Bierstaker, assistant professor of accounting, and Sally Wright, Accounting/Finance Department, co-authored an article "An Investigation of Practical Problem Solving Ability as a Predictor of Performance in Auditing Tasks," which will appear in Behavioral Research in Accounting. Bierstaker also has co-authored articles "Accounting in the New Millennium: The Impact of Technology on the Audit Process" and "Presentation Format, Relevant Domain Experience and Task Performance" for Managerial Auditing Journal.

Assistant Professor Avery Feigenbaum, department of Computer Science, recently co-authored Latin America: Gender, Participation, and Leadership, a special symposium issue on Latin American politics in the United States of Political Science and Policy, Vol. 33, No. 3 (September 2000).

Working-Class Women in the Labor Force: Knowledge Factory, edited by Michelle M. Tokarczyk and Elizabeth Faye, Department of Sociology, received an honorable mention in Library Journal's list of the ten best academic books of the 90's as chosen by their readers.

OPCS Professor Carlin Brooks Johnston has just completed her seventh book, Screened Out: How the Media Control Us and What We Can Do About It, published by M.E. Sharpe. Documenting how the media steals our future, kills our culture, and scares us to death, Johnston turns then to the important matter of why this can happen and what we can do to correct the problem.

The Boston Herald reported that Jeffrey Rink captured the tenor of Otello in the June 4th joint performance of chorus Pro Musica and Concert Opera Boston.

Corrections

The Vietnamese institute held their ninth annual seminar, not second annual as originally published in September's Spotlight. Robert Enderson was incorrectly identified as Robert Johnson.

The following CAS and OPCS faculty and alumnae were presenters at the National Women's Studies Association Conference: Ann Frances, Elaine Morris, and Victoria West, and the Politics Studies Program, Ann Cordilla, Sociology; Esther Shapiro, Psychology; Stoshana Erich, Ramona Hernandez, Maki Mario, Madhuxvi Khandelwal, and Asgedet Stefano, OPCS, Shiksu Sumega, Dottie Stevens.

Robert Bucci, research director of the UMass Poll, testified before the Committee on Clean Elections for the Massachusetts State Legislature.

New legislation has passed in the State House and is pending in the Senate that will allow the Biology Department's long-standing employee Jane Heatley to continue training her service dogs for the disabled on campus.

The Mass Action for Women Audit has entered its second year. Community meetings have been held around the state to bring women together across the barriers of race, class, and other things that divide communities.

Women have been meeting to assess their strengths and discuss their problems and to plan action steps that will result in positive change for our communities. Summer research assistant Sarah Oktay-Ouigley has compiled a resource guide based on over 400 items that the project has in its data files. The project has also launched a web site and can be accessed at www.maw.umb.edu.

In the News
