There are many people who are affected by violence fortunately that is not my case. And most of the cases violence takes places on young people which is caused by family disintegration and bad influences, and what I would do about youth violence is to give advices and try the way to help those young people who are in danger to be part of violence.

First, fortunately violence has not affected my life, but I know people and places that have been affected by violence. For example in my country El Salvador most of the people are afraid of violence. Violence that has killed many people around my country El Salvador, which it has got to the limit to scare the government, that can not do anything against it. This demonstrate how violence has affected places like my country El Salvador that even causes a impact in the government that can not do anything to fight violence. Another example is that one of my friend's family has to move to the United States because they were threatened of death in Mexico, they were being forced to give money to a gang and they could not resist any more, so they had to move to the united states. In another hand we can see how people are affected by this kinds of violence, people who have not done anything wrong.

Second, in most of the cases violence is taken by young people and most always it is caused by family disintegration and bad influences. For example in the disintegration of families the most affected are the

children, and parents start losing the care of their children, and this young kids start looking the care and the love they need in other places till they fall in bad paths and become violence, as Carlos Molina one of my neighborhood says "my parents got divorced when I was young and my brother fell in bad paths because of that" this shows what causes the youth violence in communities and countries. Another example is that young people are influenced to the violence by wrong friends, as Carlos Molina says " when my parents got divorced I became a slacker boy, and my friends always offered me drinks and cigarettes " this demonstrates how and what causes young people fall in bad paths, because of bad influences and family disintegration young people become violence.

Third, there are many ways how to help people who are in danger to fall into violence, but what I would like to do is, to organize group of people able to collaborate with those young people with problems, in their lives, also I would like to give speeches about the consequences of violence, and ways that people can take to avoid violence, and to stop it.

In conclusion violence takes an important role, because many people are affected around the society by this issues that most of the young people do, and we as part of the society are capable to help avoid this problem and put a stop to violence.
