Poverty in Massachusetts for Families with Children

Massachusetts has lower poverty rates compared to the US average for all families with children. The poverty rates for female-headed families with children (single mother families) are 5.5 times higher than those of married couples with children in Massachusetts and the US.

Massachusetts Distribution of Total Population by Families with Children

- Married-Couples
- Male householder, no wife present
- Female householder, no husband present

Massachusetts Distribution of Total Poor Population by Families with Children

- Married-Couples
- Male householder, no wife present
- Female householder, no husband present

Single mother families are almost one out of every four families with children but comprise close to 61% of all poor families with children in Massachusetts.
