Pre-Employment Transition Services for Students with Intellectual Disabilities

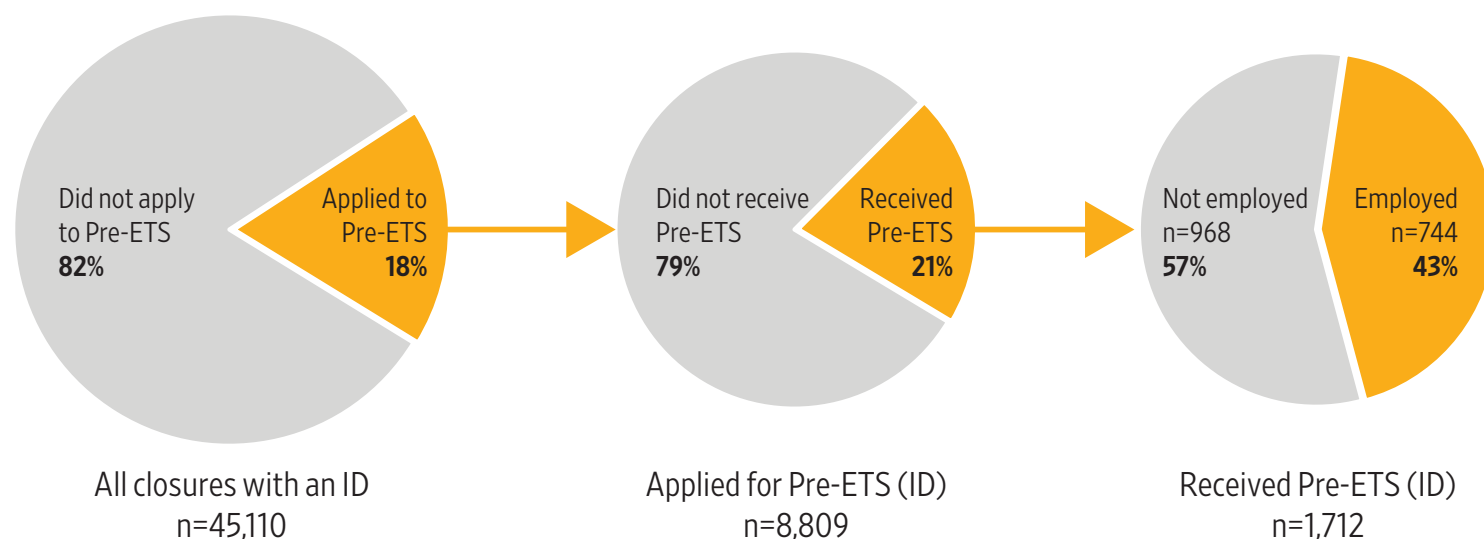

By Alberto Migliore and John Butterworth

The Workforce Innovation and Opportunity Act (WIOA) of 2014 requires that vocational rehabilitation (VR) agencies set aside at least 15% of their federal VR services grant funds to assist students with disabilities. These students are entitled to receiving pre-employment transition services (Pre-ETS). Pre-ETS include job exploration counseling, work-based learning experiences, counseling on enrollment opportunities, workplace readiness training, and instruction in self-advocacy.

This DataNote explores the effects of this WIOA provision on people with intellectual disabilities (ID) who exited the VR program during program year 2018 (July 1, 2018 to June 30, 2019).

Of the 45,110 people with ID who exited the VR program, a total of 8,809 (18%) were students who applied for Pre-ETS. Of these, 1,712 (21%) received Pre-ETS and of those who received Pre-ETS, 744 (43%) gained employment. Figure 1 shows these data at the national level whereas Table 1 shows the corresponding figures at the state level. Note that students might have applied for and received any of the other traditional VR services as well.
