**Thrive in 5 Boston Initiative**

**Center for Social Policy**

John W. McCormack Graduate School of Policy and Global Studies

---

**Summary**

The Center for Social Policy (CSP) is the external evaluator for Thrive in 5 Boston. As part of the initiative, CSP is helping to identify, implement, and evaluate community interventions designed to increase the readiness of Boston children for success in school at kindergarten age.

Thrive in 5 is transforming Boston into a city that values and proactively nurtures young children’s school readiness, and envisions a city where families, educators, providers, business leaders and communities come together with the knowledge, skills, and resources to prepare children for success in school and beyond.

**Goals and Objectives**

The goals of Thrive in 5 are:

- **By 2014**, interim goal = 75% of Boston’s children entering kindergarten will be ready.
- **By 2018**, all of Boston’s children will be ready for school at kindergarten entry. Today, only 54% of Boston’s children are.

This means shifting the paths of about 5,000 to 7,000 young children.

The CSP is working to:

- Design and implement evaluation of five Boston Children Thrive pilot communities;
- Design an overall evaluation plan for the initiative’s current and planned work;
- Coordinate evaluation of individual strategies with each other and the initiative overall.

---

**Results/Impacts**

- Evaluation learnings are used by community partners to inform their practice
- UMass Boston team is a thought partner, providing real time feedback for immediate use
- 5-6 UMass Boston students are involved per semester, approx 100 hours per student—conducting interviews in multiple languages
- The evaluation team taps multiple university resources by including students and faculty from four departments and the CSP.

---

**Approaches and Methods**

Thrive in 5’s approach is to identify and implement a set of school readiness measures, from birth through kindergarten, that account for the 5 nationally-recognized domains of school readiness: language development; cognition and general knowledge; approaches to learning; social and emotional development; and physical and motor development. “School ready” is currently measured by the DIBELS, a literacy assessment.

Focus of implementation and evaluation is on: 14 priority strategies; 5 neighborhoods; 2 critical aspects of school readiness (early language and literacy skills and healthy social-emotional and behavioral development).

**The CSP’s Evaluation Team is:**

- Using progress indicators and context data to monitor Boston’s progress toward achieving school readiness.
- Focusing evaluation on impact and outcomes.
