Letting Violence Control our Lives

Violence is an action that is done all day, everyday. Violence can be done by anyone, you, me, your Friends, Family and others around you. Violence hurts and Scares People. The causes of Violence are gangs, drugs, Alcohol, Fights, temptation, Peer Pressure, drama, dares, revenge, bullying, lack of respect, Relationship Complications, Cheating, Cyberbullying, aggression, family behaviors, depression, Suicide, lack of communication, Self-harm, emotional abuse, Physical abuse, child abuse, neglect, anxiety, disability, Pain, Sexual harassment, Stress and racism.

Violence affects everyone in the world, but the main target are the young ones.

Children go through a lot, and sometimes it is hard for them to live by it. Young kids are breathing and living in drugs. A bag of drugs in a dresser and one in the hands of a grown adult. Why?, Why is it okay for you to let your child live through those conditions? Is it worth it? Think about it.

Learning Objectives (continued)

1. To understand the concept of a function and its notation.
 2. To be able to graph a function and to find the domain and range.
 3. To understand the concept of a limit and to be able to evaluate limits.
 4. To understand the concept of a derivative and to be able to differentiate a function.
 5. To understand the concept of an integral and to be able to integrate a function.
 6. To understand the concept of a vector and to be able to add and subtract vectors.
 7. To understand the concept of a matrix and to be able to multiply matrices.
 8. To understand the concept of a differential equation and to be able to solve a differential equation.
 9. To understand the concept of a probability distribution and to be able to calculate probabilities.
 10. To understand the concept of a statistical test and to be able to apply a statistical test.

11. To understand the concept of a hypothesis test and to be able to apply a hypothesis test.
 12. To understand the concept of a confidence interval and to be able to calculate a confidence interval.
 13. To understand the concept of a regression line and to be able to find a regression line.
 14. To understand the concept of a chi-squared test and to be able to apply a chi-squared test.
 15. To understand the concept of a binomial distribution and to be able to calculate probabilities.
 16. To understand the concept of a normal distribution and to be able to calculate probabilities.
 17. To understand the concept of a Poisson distribution and to be able to calculate probabilities.
 18. To understand the concept of a geometric distribution and to be able to calculate probabilities.
 19. To understand the concept of a hypergeometric distribution and to be able to calculate probabilities.
 20. To understand the concept of a beta distribution and to be able to calculate probabilities.

Kids are going to present Projects like at a Science Fair. The Poor child has worked So hard to see Kids with Proud Smiles on their faces while their parents are too. While your child is left alone, no one to show off their work to. At this point they feel neglected, because you rather take a sip of your drink and a sniff of the white drugs spread on your counter. This can lead to, depression. Not having someone there to have your back and to show off to them your happiest moments.

Children live in horrible places and streets. A gang up the street and another gang around the block. Sagging their pants, t-shirts up to their knees. A pocket knife in their back pocket and a gun in their front. All I hear is profanity, while that's probably all their educated to speak. Hollering nonsense in public, doing things they shouldn't be doing. What example are they setting for younger kids and others? At such a young, some kids don't know better. They'll think seeing another

Person doing it will allow themselves to do it as well.

Everyday, young adults are getting peer-pressured to join gangs. Being in a gang can not only affect you, but your family, and those around you. As a young adult you should be focusing on your education and future. Not focusing on something crazy like gangs. But what are gangs and what are they all about? A gang is a group of people who claim territory in society and make money by illegal activities like, selling drugs, and killing others. Gangs can be organized by hats, scarves, bandanas of different colors, race, ethnicity, territory, money making activities and tattoos or hand symbols. Sometimes to join a gang you need to do something violent like drive by shooting, murders or theft.

There goes a child entering a violent video game into his or her's console. As it loads, this game is literally all the

Violence in the world as a video game. As they play, they are getting arrested for beating up a guy in the game. It goes blank, then after having all your money taken away, your back. Hold up, this doesn't seem right. Where's the Police ride to jail. Where's the court session? Where's you being sentenced to jail for assault? So they skip it all, I see, this is where the confusion starts.

You can't get away for harrassment, you have to and will pay the consequences. So don't get it twisted. Kids get aggressive with these video games. They can become the same person, and that is not okay.

"Did you hear what she said about you," says a girl. "Did you see the look on her face when you walked by? Drama can turn into violence real quick. Sometimes the kid in the fight has a lack of communication. Instead of using there words, they use there fists. Words are more powerfull. People also use it as

Revenge. They come at you ready to do something, something to get back at you real good.

The way violence has affected my is not knowing if I'll be here tomorrow on this earth. This makes me worried.

I have to be on edge every day, every minute, because anything can happen to you. You happen to be on a dangerous world. You have to be prepared. I walk out in public, I have to notice the actions and emotions that someone is showing me. You can determine if they want to do something to you, preparing to hurt you, or want nothing to do with you.

The way I can stop violence is by not provoking it or allowing it in my presence, that means I shouldn't try getting into a fight. Then if I see others, I can break it up. I don't want anyone to get hurt during the fight and those to be afraid for watching it.

Always remember, violence is not okay. Violence is affecting millions of lives everyday. For us to stop violence we need to stand up, stand up for what you believe in and your opinion. Not only one person can stop violent actions from happening but if we all stick together, we could make a difference in us and others also.

2017

The first part of the document is a
 general introduction to the project.
 It describes the objectives and the
 scope of the work. The second part
 is a detailed description of the
 methodology used in the study.
 This includes a description of the
 data collection process and the
 statistical methods used for data
 analysis. The final part of the
 document is a conclusion and
 recommendations.
