DEFINITIONS

This Report uses several terms as defined in the "1980 Census of Population and Housing, Boston, Massachusetts, Census Tracts," Appendix A and B, U.S. Bureau of the Census.

Census Tract: Census tracts are small, relatively permanent areas into which standard metropolitan statistical areas (SMSAs) and certain other areas are divided for the purpose of providing statistics for small areas. When census tracts are established, they are designed to be homogenous with respect to population characteristics, economic status, and living conditions. Tracts generally have between 2,500 and 8,000 residents.

Household: A household includes all the persons who occupy a housing unit.

Family: A family consists of a householder and one or more other persons living in the same household who are related to the householder by birth, marriage or adoption.

Housing Unit: A housing unit is a house, an apartment, a group of rooms, or a single room occupied as a separate living quarters or, if vacant, intended for occupancy as a separate living quarters.

INTRODUCTION

The purpose of this Report is to provide a socio-economic and demographic overview of predominantly black and Latino geographic areas in the City of Boston. This Report is primarily in response to a request for assistance from several community-based groups and organizations, including Project FATE, the Center for Community Action, the Urban League, and the Bank of Commerce. Representatives of these organizations approached the William Monroe Trotter Institute for assistance in compiling information and data useful for economic analysis of several issues facing the citizenry of the Greater Roxbury neighborhood area. The Director of the Trotter Institute, Dr. Wornie Reed, and Dr. James Jennings, Senior Fellow and Director of the Trotter Institute's Community Research and Technical Assistance Program, as well as Ms. A. Jean Burnett, Research Assistant to Dr. Jennings, met several times with the representatives of these community organizations and groups to plan how to collect and present the desired information and data.

Based on specific requests and feedback from several individuals representing the organizations mentioned, it was decided that a "Community Profile" based on electoral districts in Boston would be useful. The request from the community organizations listed several possible items for inclusion in the final report:

Total population by race of selected Boston electoral districts;

Total population and distribution of population by age within selected Boston electoral districts;

Median family income by selected Boston electoral districts;

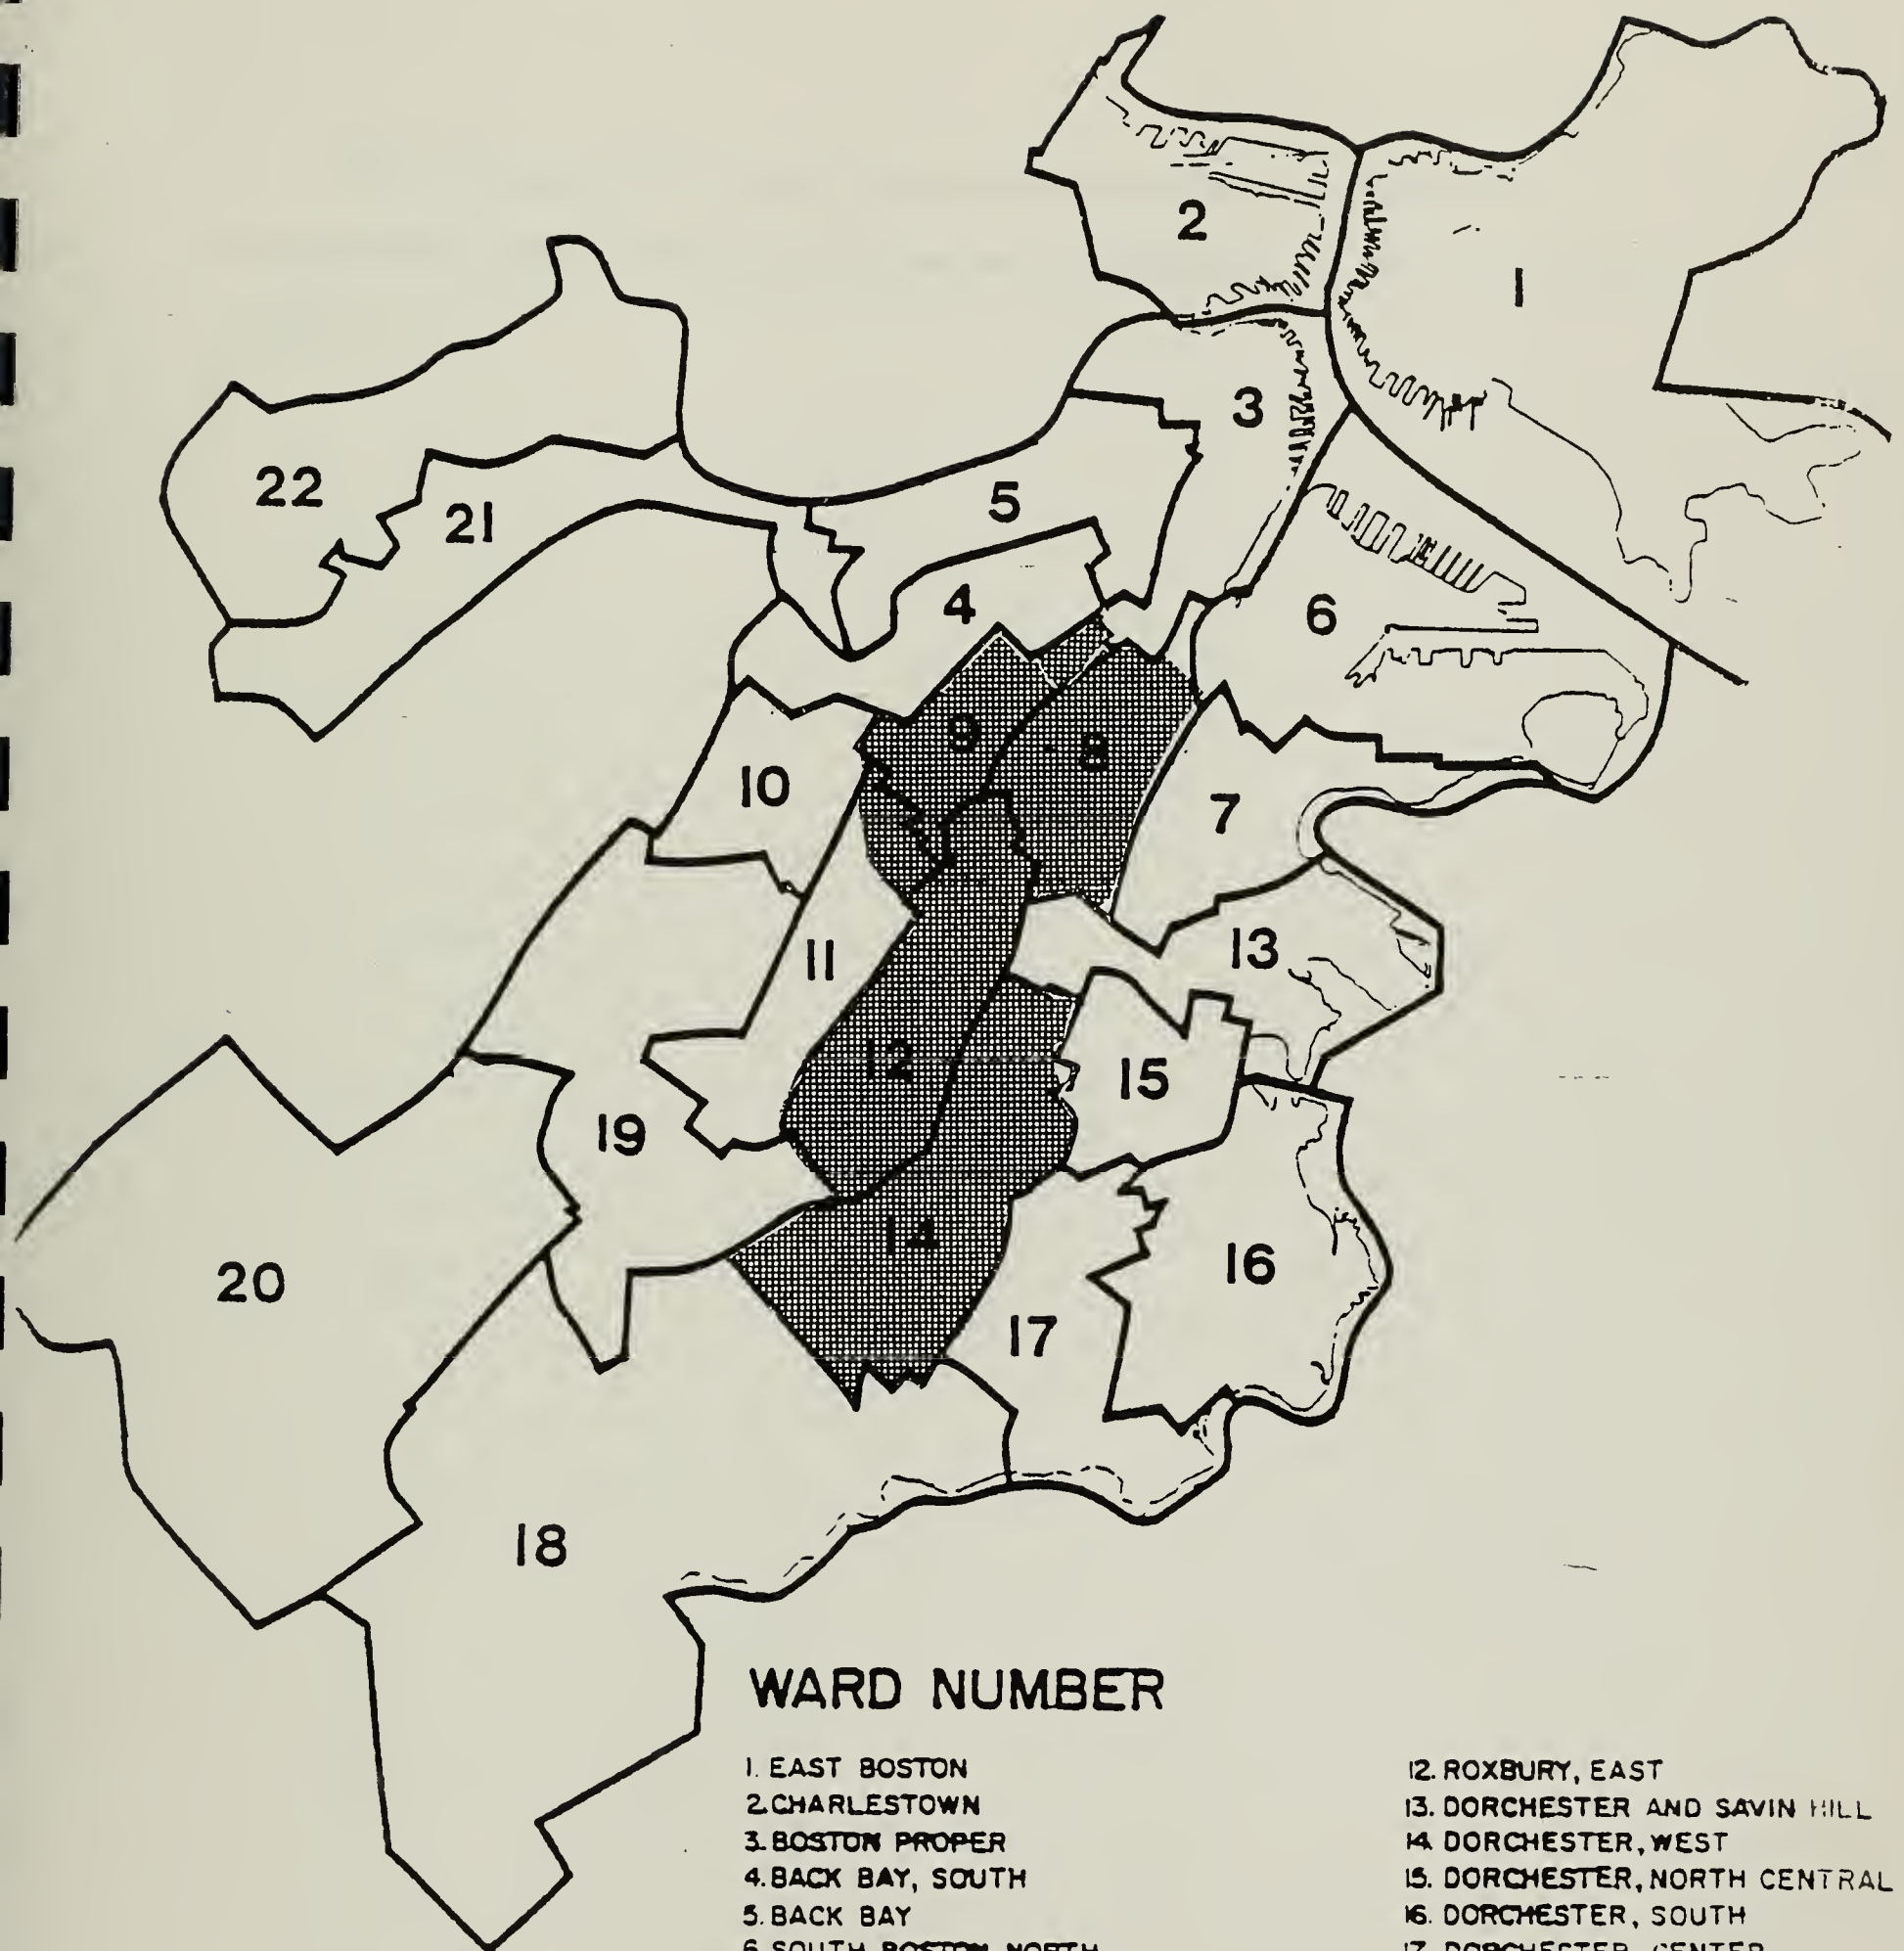

Civilian labor force and employment status, by selected Boston electoral districts; and

Median family wealth as defined by homeownership by selected Boston electoral districts.

This Report includes these items in addition to several other items (see list of Tables and Maps). The additional items pertain to demographic and social data and information for Greater Roxbury.

After James Jennings reviewed the list of items and discussed it with Wornie Reed it was decided that the William Monroe Trotter Institute could effectively respond to some of these items by: (a) developing a "Community Profile" based on the demographic items listed above and organized by Wards 8, 9, 12, and 14, and (b) appointing a panel of social scientists to plan a major publication on the economic status of blacks in Boston, incorporating the various concerns of the community groups who approached the Trotter Institute. The suggested response was discussed with all parties involved in this effort. This Report represents the "Community Profile" mentioned above.

The profile presented here may be unique in terms of its format. The data, which is extracted from the 1980 reports of the U.S. Bureau of the Census for Boston is organized according to electoral districts, as specifically requested by community representatives. All of the data is presented for Wards 8, 9, 12, and 14. These four wards contain the overwhelming majority of black and Latino persons in the City of Boston. Map 1 outlines, by wards, the areas covered by this Report.

METHODOLOGY

The data for this Report was compiled by utilization of what is known as “social areas” research. Basically, this means that electoral districts and census tracts for the City of Boston are superimposed on each other in order to determine social and economic characteristics of the areas contained within the electoral districts. James Jennings was one of the first researchers in this City to utilize this methodology in order to gather information about the black community; his research resulted in a report to the Black Political Task Force, an electoral activist organization in the black community, entitled “The Black Voter in Boston” (February 1982). Dr. Jennings also analyzed the relationship between race and class and its impact on political behavior in the black community of Boston with this methodology, resulting in an article, “Race, Class and Politics in Boston’s Black Community” (Review of Black Political Economy, Fall 1982). The Boston Redevelopment Authority also utilized this methodology in some of its reports as did Dr. Yohel Camayd-Freixas and Mr. Russell Lopez in a major, pathbreaking report on Latino political characteristics titled “Gaps in Representative Democracy: Redistricting, Political Participation and the Hispanic Vote in Boston,” published by the Hispanic Office of Planning and Evaluation, Inc., in September of 1983.

Table 1 shows wards and corresponding census tracts based on methodology. It lists wards and the corresponding census tracts in these wards. The tables in this Report rely on Table 1.

Table 1

Wards and Corresponding Census Tracts

| Wards | Corresponding Census Tracts |
|-----------------------------|--|
| Ward 8 (Precinct 1-7) | 710, 711, 712 801, 802, 803, 804 906, (913) |
| Ward 9 (Precinct 1-5) | 705, 708, 709 805, 806, 807, 808, 814 815, 816, 817 |
| Ward 12 (Precincts 1-9) | 803, 817, 818, (819), 820, 821, (1101.01) |
| Ward 14 (Precincts 1-14) | 901, 902, 903, (914), 918 919, 924, 1001, 1002, 1011.01 (1011.02) |

Source: Boston Redevelopment Authority, "1980 Census of Population by Ward and Precinct and by Census Tract and Block," February 1982.

The BRA also compiled more detailed charts assigning census tracts to electoral wards and precincts and neighborhood districts in Boston. The staff for the “Community Profile” project also relied on these charts.

Table 2 shows the corresponding census tracts for Wards 8, 9, 12, and 14 in Boston. It provides greater detail regarding the corresponding census tracts, group and block number to the precincts in Wards 8, 9, 12, and 14.

Source: Boston Redevelopment Authority, "1980 Census of Population, by Ward and Precinct and by Census Tract and Block," February 1982.

It should be noted that the superimposing of census tracts and electoral districts is not precise. The resulting corresponding boundaries may represent a certain degree of inaccuracy. For example, not all of census tract 914 is, in fact, in Ward 14. But it facilitated the collection of data to include this census tract in Ward 14. What may justify its inclusion, however, is the similar and uniform characteristics of the population in census tract 914 in terms of the relevance of these characteristics to the study. Despite this caveat, the data presented here basically reflects the characteristics of the general population in the four wards.

Map 3 presents the census tracts that, generally speaking, pertain to Wards 8, 9, 12, and 14.

Map 3 Census Tracts, City of Boston

Source: Boston Redevelopment Authority

The Report presents several tables that respond to requests for specific information and data. It begins with information regarding the total population and its race and ethnic breakdown; the Report also provides information and data about the age structure, schooling levels, median income levels, family structure, housing characteristics, and other social and economic characteristics of the population in these wards. Each table is preceded with narrative explaining the findings of the particular table.

FINDINGS

Table 3 lists the total population and racial breakdown of each ward and precinct in terms of blacks, Latinos and whites in 1980. The percent distribution of the total population by these racial and ethnic categories is also presented.

In 1980 the ward and precinct with the largest number of blacks is Ward 12, precinct 7 (4,073); the ward and precinct with the largest number of whites is Ward 8, precinct 2 (1,390), while the largest number of Latinos resided in Ward 9, precinct 1 (1,035). But the wards and precincts with the largest percentage of blacks are Ward 14, precinct 14 (96%) and Ward 12, precinct 5 (95%). The precinct within this area with the largest percentage of whites is Ward 8, precinct 2 (50%).

Table 3

Total Population in 1980 by Race and Ethnicity for
Wards 8, 9, 12, and 14 by Precinct

| Ward | Total Population | # of Blacks (% of total) | # of Latinos (% of total) | # of Whites (% of total) |
|----------|------------------|--------------------------|---------------------------|--------------------------|
| W 8 (1) | 1,196 | 480 (40.1) | 447 (37.4) | 363 (30.4) |
| W 8 (2) | 2,777 | 1,056 (38.0) | 350 (12.6) | 1,390 (50.1) |

Table 4 shows the total population by wards and by racial and ethnic categories of black, Latino, and white. The total population of Wards 8, 9, 12 and 14 is 101,227 persons. Blacks comprise 76,413 persons or 75.4% of the total, while Latinos account for 12,147 persons or 12% of the total population in these four wards. According to the 1980 U.S. Bureau of the Census population count, there are approximately 126,229 blacks and 36,068 Latinos residing in the City of Boston. This means that about 34% of all Latinos in the City live in these four wards, and, approximately 60.5% of all blacks in the City live in Wards 8, 9, 12, and 14.

Table 16 shows the precincts with the highest and lowest family median income levels for Wards 8, 9, 12, and 14 in 1979. It presents this information by race and ethnicity. For blacks, one precinct in Ward 8 has the highest median income level of \$22,083. The precinct with the lowest median income level for blacks in Wards 8, 9, 12, and 14 is found in Ward 9 (\$6,250).

Table 16

Highest and Lowest Family Median Income Levels by
Race and Ethnicity for Precincts in Wards 8, 9, 12, and 14

| WARD | Highest "Precinct" Family Median Income in Ward | | | Lowest "Precinct" Family Median Income in Ward | | |

Table 17 shows the number of persons in Wards 8, 9, 12, and 14 over 16 years in various occupational categories in 1980. For each ward, the largest occupational category for blacks includes "Technical, Sales, Administrative Support and Clerical." Approximately 31.5% of all employed blacks over 16 years of age are found in this category of occupations in Wards 8, 9, 12, and 14. About 13% of all employed blacks over 16 years of age are in the "Managerial and Professional Specializations." Slightly more than one quarter of this group is found in the service occupations, including private household and protective service. The "Precision, Production, Craft and Repair" occupational categories claims only a small proportion, about 7% of all employed black persons over 16 years of age.
