Pilot Projects

Can a soccer tournament be used to educate African immigrants on HIV prevention, and to promote HIV testing and positive health behaviors?

What challenges do low wage workers have in maintaining a healthy weight? What policy changes can we make?

These are some of the questions that UMass researchers and community organizations have collaborated to investigate with our Pilot Project in Translational Research program. To date, 12 projects have been funded to learn more about vulnerable groups of people and address health disparities.

Working to improve health by developing & nurturing community engaged research that is fostering through equitable partnerships between UMass campuses and their communities.

The UMCCTS Community Engagement and Research Section works to improve health in Massachusetts by fostering community engaged research among UMass researchers and community partners. We do this through conferences, pilot funding opportunities, webinars, training, consultation, linking researchers with community partners, and an email discussion group (listserv). Join us!

Visit our website for agendas, presentations, and posters of past symposia.: www.umassmed.edu/CCTS/Community

List Serv

Join our listserv to learn of new events and information, ask questions, & discuss!
